ARGONNE NATIONAL LABORATORY

December 10, 2003

TO: J. Behrndt, A. Boron, J. Carwardine, R. Emerson, M. Fagan, N. Friedman, J. Hawkins, P. McNamara, V. Nguyen, J. Servino, S. Ross

SUBJECT: Generation-3 Meeting Minutes for December 10, 2003

Criteria for connection to ESD

- The main concern is with the question of interpretation/guidance of what does or does not belong in the ESD.
  - Search and Secure
    - This does not fall into the guidelines. It was agreed upon by the group that it should all go into Chain A.

Diagram on Page 21

- We have to agree on the rules on what goes where?
- We need to use the rules to generate the document, then we will meet again and discuss what changes may be needed.
- Next step based on the rules is to map it.

Mike Fagan

- Incorporating discussion from the Monday meeting. It was noted that if anyone comes across and DVD's to please email those to Mike.

John Servino

- Introduced new document that will go back and incorporate functionality. He wants to make the functions understandable.
- He noted that there are a considerable amount of functions to deal with.
- What is the purpose
  - Rule compliance – an agreement on where equipment will be put.
  - Which signals need to be set up – more or less, how they should be set up.
  - Functions – what functions will go in what chains.

High Level Functions – not resolved

- Door Locks – Put in Chain C
- Mode Shutter Keys
- Where should switches go?
  - It was decided to put them in Chain C.
- Kirk Locks
